IT'S YOUR CITY - PROTECT YOUR ENVIROMENT!

The Environmental Resources Management Division of Public Works is developing a Sustainability Plan for the City of Miami Beach. Please join us for the first committee meeting on Tuesday, August 8, 2006.

Sustainable development aims to simultaneously achieve economic, environmental and social objectives; known as the "triple bottom line." The Sustainability Plan will be developed through an Environmental Sustainability Committee comprised of city departments, business owners, developers, residents and other interested stakeholders. The Sustainability Plan will seek to sustainably satisfy economic growth, while benefiting our local environment and quality of life.

Catch the Wave - It's Green!
